

Durgun 38 – Operating Instructions

**Durgun does it all.
Professional and easy to use for:**

- Sealing
- Dispensing resins
- Grouting
- Extracting fluids

The unique Durgun dispensing gun gives you total control. The revolutionary design uses a reversing mechanism to take the pressure off and eliminate seepage, drips and waste – it even lets you recycle cylinders.

Handles tubes from 300mm to 600mm in length right to the end. No waste. No mess. No problem!

INSTRUCTIONS

CARTRIDGES

1. Extend plunger slightly away from main body (Fig 1)
2. Push cartridge onto plunger. (Fig 2)
3. Screw cartridge until the plunger locks into the bottom of cartridge and washer expands and grips. (Fig 2)
4. Open clamp, push reverse lever up while pulling the cartridge into the clamp. (Fig 3)
5. Pull cartridge firmly into clamp and lock clamp shut. (Fig 4)

REMOVING CARTRIDGES

1. Unscrew spindle a few turns.
2. Lift rear lever and pull back spindle. (Fig 5)
3. Unclamp and remove cartridge.

Fig 4

Fig 5

REVERSE FUNCTION

1. Press the reverse lever down to reverse the spindle. (Fig 6)

Fig 6

RE-USE SPENT CARTRIDGES

1. Remove 'bung' from spent cartridge using the reverse function.
2. Fully clean spent cartridge.
3. Refill cartridge as required.
4. Replace bung into cartridge.
5. Proceed as for new cartridge.

IMPORTANT

1. ALWAYS cut nozzle before pressing trigger handle, or damage to the product WILL occur!
2. Do NOT hold trigger when reversing.
3. Do NOT allow air to be sucked into the cartridge as the contents will solidify.
4. Ensure nozzle is clear before use.
5. ALWAYS slacken rubber washer when not in use.
6. Always wear the appropriate safety equipment.
7. Keep out of reach of children and pets.
